

ENSTO

Give your Load Break Switches a second life

To improve medium-voltage network efficiency, the network needs to be restructured.

For this reason, you may need to uninstall overhead load break switches.

Ensto offers you a way to give your equipment a "second life".

No need to throw it away – Let's recycle together!!

Why trust Ensto?

Ensto is the French manufacturer of load break switches with SF6 break technology.

Ensto has been an expert in developments in this range of products, since its first market launch in 1999.

There is now an installed base of over 18,000 load break switches across five continents.

Are you concerned about Load breaking switch?

In your installed base, you may encounter different generations of equipment which have changed over the last 20 years:

- Load break switch with first motor-operated version,
- First pole-operated version,
- First version of pole mounting accessories

Ensto uses all its expertise to refurbish your load break switch equipment, so that it can be safely reinstalled in your electrical distribution equipment.

Customer benefits

- Logistics and transportation, handled by Ensto (please contact us)
- Upgrade to the newest version
- Integration of the new options available
